Configuration Changes Of Crankcase Heater For Reciprocating Compressors In The C1 Family

CONFIGURATION CHANGES OF THE CRANKCASE HEATER FOR RECIPROCATING COMPRESSORS IN THE C1 FAMILY

GENERAL

To avoid mistakes in the future order processing, the configuration of the crankcase heater for family C1 reciprocating compressors will be changed as of 1st of July, 2021.

FURTHER INFORMATION

There will be two crankcase heater configurations available for compressors family C1:

- **Option1** 0 .. 60 W - **200 .. 400 V**, PTC, with UL, Material Number: 34322401
- **Option 2** 0 .. 60 W - **100 .. 240 V**, PTC, without UL, Material Number: 34322402

IMPORTANT

- This change has no influence on use or function of the compressor crankcase heater.
- However, the customers have to be aware of this change and mention the needed crankcase heater power supply on their order.
- **If the power supply of the crankcase heater is not mentioned, option 1 will be selected automatically.** Means that if the crankcase heater is needed with power supply < 200 V: 100 V...127 V, this must be mentioned on the order.

Picture 1: crankcase heater for family C1 ,
Material Number: 34322402
(Option 1, automatically selected if power supply is not given)

Picture 2: crankcase heater for family C1,
Material Number: 34322401
(Option 2, must be mentioned on the order)
